Policy on Remediation of an ACS Course Grade

- Students can appeal an unfavorable grade in an Ambulatory Community Selective Course to the ACS Course Committee.

- Any I (incomplete), PC (partially competent), or F (failure) grade must be resolved or remediated in the same discipline as the original ACS course, but not necessarily with the same preceptor.

- Failure of the clinical component will result in course failure.

- Failure to meet the minimum time requirements (50% clinical) will result in an Incomplete if due to missed days outside the control of the student, or PC if students attended the entire block but did not meet the minimal requirements for clinical experience.

- Poor quality of work regarding another component of the course may be cause to redo the required paper or product at the discretion of the Course Director if completed prior to then end of the course. However, any unacceptable work still outstanding by the end of the course will result in a grade of PC. This work must be resolved during a subsequent grading period with award of a PC-P or PC-F as a final grade in the course. (For example, if a student is directed to submit a report of some sort, and the report is of unacceptable quality, the student can, at the discretion of the course director, redo the report prior to completion of the course, and if acceptable in quality, a grade of P can be awarded. If however, acceptable quality of work is not received prior to the end of the course, a grade of PC is awarded and can only be resolved as PC-P or PC-F). A grade of PC must be resolved in a manner acceptable to both the Course Director and the ACS Committee.
